About the journal

Language Development Research: An Open-Science Journal was established in 2020 to meet the field's need for a peer-reviewed journal that is committed to fully open science: LDR charges no fees for readers or authors, and mandates full sharing of materials, data and analysis code. The intended audience is all researchers and professionals with an interest in language development and related fields: first language acquisition; typical and atypical language development; the development of spoken, signed or written languages; second language learning; bi- and multilingualism; artificial language learning; adult psycholinguistics; computational modeling; communication in nonhuman animals etc. The journal is managed by its editorial board and is not owned or published by any public or private company, registered charity or nonprofit organization.

Child Language Data Exchange System

Language Development Research is the official journal of the **TalkBank system**, comprising the CHILDES, PhonBank, HomeBank, FluencyBank, Multilingualism and Clinical banks, the CLAN software (used by hundreds of researchers worldwide to analyze children's spontaneous speech data), and the Info-CHILDES mailing list, the de-facto mailing list for the field of child language development with over 1,600 subscribers.

Diamond Open Access

Language Development Research is published using the Diamond Open Access model (also known as “Platinum” or “Universal” OA). The journal does not charge users for access (e.g., subscription or download fees) or authors for publication (e.g., article processing charges).

Hosting

The **Carnegie Mellon University Library Publishing Service** (LPS) hosts the journal on a Janeway Publishing Platform with its manuscript management system (MMS) used for author submissions.

License

Language Development Research is published by TalkBank and the Carnegie Mellon University Library Publishing Service. Authors retain the copyright to their published content. This work is distributed under the terms of the **Creative Commons Attribution-Noncommercial 4.0 International license** (<https://creativecommons.org/licenses/by-nc/4.0/>), which permits any use, reproduction and distribution of the work for noncommercial purposes with no further permissions required provided the original work is attributed as specified under the terms of this Creative Commons license.

Peer Review and Submissions

All submissions are reviewed by a minimum of two peer reviewers, and one of our [Action Editors](#), all well-established senior researchers, chosen to represent a wide range of theoretical and methodological expertise. Action Editors select peer reviewers based on their expertise and experience in publishing papers in the relevant topic area.

Submissions and Publication Cycle

We invite submissions that meet our criteria for rigour, without regard to the perceived novelty or importance of the findings. We publish general and special-topic articles (“Special Collections”) on a rolling basis to ensure rapid, cost-free publication for authors.

Language Development Research is published once a year, in December, with each issue containing the articles produced over the previous 12 months. Individual articles are published online as soon as they are produced. For citation purposes, articles are identified by the year of first publication and digital object identifier (DOI).
